---

Edelen Renewables was the first to employ a “social impact” approach to solar development to ensure the benefits of solar investments are felt locally.

---

## Social Impact Solar<sup>SM</sup>

Prioritizing the hiring and training of local workforce to construct projects.

Payments in lieu of taxes tailored to each community’s needs.

Working closely with local stakeholders to create legacy projects that live beyond the life of the solar project.

Our projects have helped some of the *world’s most known companies reach their carbon reduction targets*
